

Do It All with the Recycling Bill Changer

NEW!

Rowe's new Model 400 comes in dual validator and dual hopper front and rear load models to help customize bill changers to meet operators' needs. These high security, economically-priced changers hold an impressive 11,200 quarters (\$2800) or tokens and offer features only found in Rowe's top-of-the-line Bill Breaker models. Operators can choose to have two validators, giving them a backup, or two recycling bill validators, turning the changer into a mini bill breaker that recycles and dispenses \$1 and/or \$5 bills. Operators can also select the USA Technologies ePort credit card reader, which accepts all major credit cards and dispenses tokens, while also having a second back up bill validator. Additionally, the Model 400 can connect to a remote computer for audit and help code reporting. This line of bill changers truly does it all!!
